DF955-SW

CD Network Manager SW for fence protection

The Network Manager software (DF955-SW) initiates and controls all communications over FlexP/ FlexZone network and provides the interface for sensor alarm
reporting and system management.
The Network Manager (NM) is a Windows-based software package that can reside on the same PC as the SMS (Security Management System) or on a dedicated PC. The physical connection of the NM to FlexPS/ FlexZone processor (network enabled) is through the Silver Network Interface Unit (DF955-U).

Details

- Windows-based SW
- Supports remote connection to Universal Configuration module (UCM)
- Provides management tools (Plot tool, Status tool, Event Log tool) for centralized system monitoring and configuration capabilities
- Includes SDK with complete API documentation, test software and network manager simulator
- Redundant configuration option for critical applications
