9-30441-JUM

Excellence Addressable Panel Interface Card (APIC) Jumper expander

Description

The 9-30441-JUM is used in conjunction with the 9-30441 when more that five APIC's are required to be used on one addressable loop. With the 9-30441-JUM the amount of APIC's on the addressable loop can be increased up to a maximum of 10.

Fitment

The 9-30441-JUM plugs directly into the ModuLaser display module backplane, and in turn the addressable loop is wired directly to the 9-30441-JUM.

Details

- Simple plug-in expansion
- Expand amount of APIC's supported on addressable loop
- Piggy backs onto ModuLaser display module backplane
