KE-DBA-SKTW

Intelligent addressable base accessory - trim skirt (white)

General

The innovative Excellence range of intelligent addressable devices offers advanced features for reliability and peace of mind. Coupled with features for ease of installation and maintenance on new fire detection systems, it's a perfect match for exceptional overall performance.

The KE-DBA-SKTW is an Excellence series, base accessory. It offers the possibility to cover unsightly marks on ceilings surrounding the detector base. For retrofit applications it is especially handy when old devices are removed, normally leaving an unsightly brown border where the old detector was situated. With its matching white colour and same aesthetic finish as the Excellence series detectors, it finishes off any installation beautifully.

Installation

The KE-DBA-SKTW requires no special tools or additional parts for installation. The Excellence series detector base clips onto the trim skirt and with the standard base screw, both parts are easily attached to the ceiling in the normal way. Placed between the standard detector base and the ceiling, the pair is mounted on the same holes that is used for a standard detector base when used alone. The trim skirt uses the same screw orientation holes as the standard base, allowing for proper positioning on the ceiling in the normal way.

Since the address tag locations on the standard base become unusable due to the trim skirt, the trim skirt offers two new tag locations neatly along its edge in similar locations as is available on the standard base. To make fitting the detector to the base/trim skirt combination easier, new alignment aids for insertion and locking of the detector is present on the trim skirt rim, making alignment more visible.

Details

- Covers marks on the ceiling when new detectors are installed in old detector locations eliminating the need for ceiling touch ups
- Matches the colour and design of the Excellence series detector base, allowing for an aesthetic, integrated look
- Two fitting locations for address tags on opposite sides avoid unnecessary time spent on base alignment
- Detector alignment and insertion guides remain visible and are extended
- Supports Excellence series bases without feature loss
- Keyhole alignment screws similar to the standard base avoids rework on standard installation holes

KE-DBA-SKTW

Intelligent addressable base accessory - trim skirt (white)

Technical specifications

General

Compatibility	Excellence series bases

Physical

Physical dimensions	150 x 7 mm (Ø x H)
Net weight	75 g
Colour	Biały (RAL 9016)
Mounting type	Loftmontering
Cable entries	1
Material (body)	Støbt ABS

Environmental

Vandal proof	No
Environment	Indendør, Udendørs

Regulatory

Compliancy	CE, REACH, RoHS 3, WEEE
Certification	CE

Compatible products

Category	Reference	Description
Detection device	KE-DB3010W	Excellence series intelligent device accessory - standard base
Detection device	KE-DBA-TAGW	Intelligent addressable base accessory - address tag (white), supplied in packs of 10
